

KNOWLEDGE MOBILIZATION

The institute has embraced a model of knowledge production and mobilization that is meant to foster innovation and address the challenges facing the hardwood forest sector.

The success of the Institute resides in the novel way it mobilizes knowledge for its customers and materializes it into tangible benefits. The NHRI has already produced over 150 technical notes, synthesis documents, guides, scientific publications as well as several novel tools and solutions namely, its flagship Silvicultural Prescription System (SPS) and a tree classification system for New Brunswick which is now being piloted on N.B. Crown Lands and other jurisdictions and land tenure types. At NHRI we have endeavor to churn out 4 types of knowledge mobilization.

KNOWLEDGE MOBILIZATION

4 TYPES OF KNOWLEDGE MOBILIZATION

IMPROVING our partners' forest management capacity through consultancy and the development and implementation of management and decision support systems.

ENABLING better management and decision making by developing best management practices, models, tools, APPs and analysis capacity.

TRAINING staff and professionals through workshops, videos and courses.

INFORMING the scientific/professional community and the public at large by publishing papers, reports, conferences, social media, newsletters and presentations.
