

Carine Annecou

Forest Engineer

Carine holds a bachelor's degree in forest management and environment from l'Université Laval. A forest engineer with 20 years of experience, she specializes in the field of sugar maple and its resistance to climate change. Carine's expertise is an important resource and reference for the Northern Hardwoods Research Institute in its research on sugar maple and red maple. In addition, in terms of climate change, she coordinated a guide on the risk of these changes in the Centre du Quebec. A first volume was released, and many versions have been made since. A second volume that will deal with silviculture for adaptation to climate change is also planned.
