

# Kamille Lemieux

GIS Analyst and technical support

- **KAMILLE** holds a bachelor of science degree in Biology (May 2020) and she will shortly hold a master of science degree in Forestry (May 2023) from the University of New Brunswick in Fredericton.
- Working at the NHRI as a GIS Analyst and Support is Kamille first non-student position. Her master's is titled "LiDAR-Based Potato Crop Suitability Mapping Along the Upper Saint John River Valley in New Brunswick". The objective of her research is to, in part, expand agricultural activities across NB, especially across forested lands deemed most suitable for farming. She has had numerous student jobs in the field of forestry, including most recently working as a Graduate Teaching Assistant for Forestry courses "Introduction to GIS" and "LiDAR" at UNB.
- Kamille's main role at NHRI is to be conducting spatial and non-spatial analyses of forest inventory data.
- While not at work, Kamille like's hiking, paddleboarding, snowboarding and snowshoeing.
